SNP array technology: an array of hope in breast cancer research

Ching Ching HO* *MSc*, Kein-Seong MUN* *MBBS, MPath* and Rakesh NAIDU** *MSc, PhD*

**Department of Pathology, Faculty of Medicine, University of Malaya and **School of Medicine and Health Sciences, Monash University Sunway Campus*

Readers are hereby informed of an error in the first sentence of the Introduction Section of the above article.¹ The number of breast cancer cases was wrongly cited. The sentence should read “World-wide, breast cancer remains the most common form of malignancy in women with approximately 1.38 million cases reported in the year 2008.”

The error is regretted.
